

# absolutes

concretes

We wouldn't exist without you.

The Tournaire company came to be in 1833 with the first distillers of the perfume plants of Grasse. We were boilermakers at first, then manufacturers of stills and modern extractors, then of copper and aluminum "estagnons," and now our monobloc aluminum bottle with its unique closure system... We developed our savoir-faire in perfect step with the evolution of perfumery and the very specific needs of the industry. Our businesses have long been closely connected, and we maintain the highest quality, service, and safety standards in the world... for you.

Extraction: Processing the broadest spectrum of raw materials.

A panoply of flowers, leaves, gums, resins, powders... Whatever raw material you choose to work with, we have just the equipment for it, perfect for producing essential oils, concretes, absolutes, resinoids, oleoresins... Our range of stirred or static discontinuous extractors meets every need in modern perfumery.

Tournaire: Certified quality.

Tournaire products meet today's most demanding quality standards and are manufactured in accordance with the strictest specifications.

PERFUMERY

Tournaire and perfume: Sharing a story of sweet success since 1833

Tournaire :  
The leader in the world of  
*fragrance*.

Based in Grasse, France, the world capital of perfume, the Tournaire company manufactures aluminum bottles that are legendary on every international market. Strategically positioned across the planet, our network can fill an order on a moment's notice from our ample reserve of product stock.

**Tournaire by the numbers:**

- Over 180 years of experience.
- 240 staff in France.
- A 20.000 m<sup>2</sup> plant.
- Exports 65% of production on the six continents.
- Established in 60 countries through a network of agents and distributors.

compositions

**A product range for every need.**

For protecting, storing, transporting or sampling perfume compositions and aromatic raw materials over the world... Tournaire has a wide selection of capacities for you to choose from 10 g up to 20 kg. These containers let you package everything from powders and concretes to compositions and perfumery raw materials.

**Tournaire bottles: Protection to the last drop.**

With their unmatched quality and 99.5% pure aluminum construction, Tournaire monobloc bottles are designed to protect and ship the most precious materials without losing a single drop.

Perfectly neutral and infinitely recyclable, Tournaire bottles safeguard your products inside and out, from shocks, oxidation, UV rays, air... and the passage of time.

precious

services

**Tournaire works for you.**

Tournaire has created a full range of highly specific services and state of the art technical accessories to satisfy the needs of the most demanding professionals.

**Essential accessories.**

We offer just what you need: caps with pouring lip, the option of applying a tamper-evident seal, a tightening bolt, a dynamometric key...

**Optimal security.**

In addition to UN-approved shipping cartons, Tournaire's full range of System Plus products is now UN-stand alone certified, with UN registration number on every single bottle from 50cc up to 32 litres. This UN line is available in standard. As for traceability, on each Tournaire bottle base you'll find our logo together with a production batch identification code.

**System Plus: An unrivalled closure system.**

To give your products the ultimate protection in airtight and watertight, and thanks to its unique know-how Tournaire manufactures System Plus, a closure system developed exclusively by Tournaire.

transport

Sampling

**Customized service.**

Tournaire creates custom-designed tampography on caps and color lacquer and serigraphy on bottles, so you can personalize your product exactly as you like...to ensure your brand is immediately recognizable.

**Samples and compositions:**

To make raw materials easier to handle in the lab during the composition creation process, and so that sending samples worldwide is as simple as can be, Tournaire has a range of small-capacity bottles in glass and aluminum, with screw caps, droppers, or sprays.
